[1610000] Explanation for Significant Accounting Policy - General Industry

Kebijakan akuntansi signifikan

Significant accounting policies

30 June 2026		
Kebijakan akuntansi signifikan		Significant accounting policies
Dasar penyusunan laporan keuangan konsolidasian	The accounting policies applied in the preparation of these consolidated financial statements are consistent with the accounting policies applied in the preparation of the Group consolidated financial statements for the year ended December 31, 2025, except for the adoption of amended accounting standards effective January 1, 2026 as described in the related accounting policies. The consolidated financial statements, except for the consolidated statement of cash flows, have been prepared on the accrual basis using the historical cost basis of accounting, except for certain accounts which are measured on the bases described in the related accounting policies for those accounts. The consolidated statements of cash flows are prepared using the direct method, and classified into operating, investing and financing activities. Additional disclosure is presented to evaluate changes in liabilities arising from financing activities, including the changes arising from cash flows or non-cash changes. When the entity adopts accounting policy retrospectively or restates items in its financial statements or the entity reclassifies the items in its financial statements, the statement of financial position at the beginning of comparative period is presented. The presentation currency used in the preparation of the consolidated financial statements is Rupiah (Rp), which is also the functional currency of the Group. The preparation of consolidated financial statements in conformity with Indonesian Financial Accounting Standards requires the use of certain accounting estimation and assumptions. It also requires management to exercise its judgment in the process of applying the Group accounting policies.	Basis of preparation of consolidated financial statements
Prinsip-prinsip konsolidasi	entity (the parent) that controls one or more other entities (subsidiaries) present consolidated financial statements. Investors, apart from the nature of their involvement with an entity (investee), determine whether they are a parent by assessing if they control the investee. An investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Therefore, the investor controls the investee if, and only if, it has all of the following: (a) power over the investee; (b) exposure or rights to variable returns from its involvement with the investee; and (c) the ability to use its power over the investee to affect the amount of the investor returns. An investor reassesses whether it controls an investee if facts and circumstances indicate that one or more of the three (3) control elements have changed. An investee is consolidated from the date the investor obtains control of the investee and continues to be consolidated until the date that such control ceases. A parent determines whether it is an investment entity. An investment entity is an entity that: (a) obtains funds from one or more investors for the purpose of providing investment management services; (b) commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income, or both; and (c) measures and evaluates the performance of its investments on a fair value basis. A parent that is an investment entity measures its investments in particular subsidiaries at fair value through profit or loss. Non-controlling interest represents a portion of the profit or loss and net assets not attributable to the parent and is presented separately in the consolidated statements of profit or loss and other comprehensive income, and within equity in the consolidated statements of financial position, separately from equity attributable to the parent. Total other comprehensive income is attributed to the	Principles of consolidation

owners of the parent and the non-controlling interests even if this results in the non-controlling interests having a deficit balance. All significant intercompany transactions and balances have been eliminated. Changes in the ownership interests: Changes in a parent ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions, in which the carrying amounts of the controlling and non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiary. The difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the parent. If a parent loses control of a subsidiary, the parent: (a) derecognizes the assets (including goodwill) and liabilities of the former subsidiary from the consolidated statements of financial position; (b) recognizes any investment retained in the former subsidiary at its fair value at the date when control is lost, and subsequently accounts for it and for any amounts owed by or to the former subsidiary. That fair value shall be regarded as the fair value on initial recognition of a financial asset or, if appropriate, the cost on initial recognition of an investment in an associate or joint venture; (c) recognizes the gain or loss associated with the loss of control attributable to the former controlling interest.

Kas dan setara kas	Cash and cash equivalent consist of cash on hand and in banks, and time deposits with original maturities within three (3) months or less and not pledged as collateral or restricted in use.	Cash and cash equivalents
Piutang usaha dan piutang lain-lain		Trade and other receivables
Persediaan	Cost is determined based on the weighted average method and comprises of all costs including entry fee and transport fee incurred in bringing the inventory to its present location and condition.	Inventories
Tanaman produktif		Bearer plants
Aset tetap	Group had chosen the cost model as the accounting policy for its fixed assets measurement. Depreciation is calculated on a straight-line basis over the useful lives of the assets. Estimated useful lives of fixed assets are as follows: (1) Building: 10 year; (2) Hauling road: 20 year; (3) Jetty and stockpile: 20 year; (4) Heavy equipment: 8-20 year; (5) Barge: 20 year; (6) Tugboat: 10 year; (7) Floating transhipper vessel: 16 year; (8) Vehicle: 8 year; (9) Tools and equipment: 4 year The fixed assets useful lives and methods of depreciation are reviewed and adjusted, if appropriate, at the end of each reporting period. Land is stated at cost and is not depreciated. Assets under construction are stated at cost and presented as part of Assets in the consolidated statements of financial position. The accumulated costs will be reclassified to the appropriate fixed assets account when construction is completed and the assets are ready for their intended use. The cost of repairs and maintenance is charged to profit or loss as incurred; replacement or major inspection costs are capitalized when incurred if it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be reliably measured. An item of fixed assets is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising from the derecognition of the asset is included in profit or loss in the period in which the asset is derecognized.	Fixed assets
Tanah belum dikembangkan		Undeveloped land
Aset biologis		Biological assets
Perkebunan plasma		Plasma plantations
Penurunan nilai aset nonkeuangan	Group evaluates at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the Group estimates the recoverable amount of the asset. The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs of disposal and its value in use. Whenever the carrying amount of an asset exceeds its recoverable amount, the asset is considered to be impaired and is written down to its recoverable amount. The	Impairment of non-financial assets

impairment loss is recognized immediately in profit or loss. Reversal on impairment loss for non-financial assets other than goodwill is recognized if, and only if, there has been a change in the estimates used to determine the asset recoverable amount since the last impairment test was carried out. Reversal on impairment losses is immediately recognized in profit or loss, except for assets presented using the revaluation model in accordance with another PSAK. Impairment losses relating to goodwill are not reversed.

Utang usaha dan liabilitas lain-lain		Trade payables and other liabilities
Pengakuan pendapatan dan beban	Revenue recognition has to fulfill five (5) steps as follows: (1) Identify the contract with a customer. (2) Identify the performance obligations in the contract. (3) Determine the transaction price. (4) Allocate the transaction price to each performance obligation. (5) Recognize revenue when the performance obligation is satisfied by transferring promised goods or services to a customer, when the customer obtains control of that goods or services. The five-step model for revenue recognition of the new standard is aligned with the Group current business model and practices. Thus, the adoption of this new standard had no impact on the Group consolidated financial statements. Revenues from service activities are recognized in the period in which the services are rendered, with reference to the completion of specific transactions, assessed on the basis of the actual services provided as a proportion of the total services to be provided. For all financial instruments measured at amortized cost, finance income or cost are recorded using the effective interest method, which uses the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or liability. Expenses are recognized as incurred on an accrual basis.	Revenue and expense recognition
Penjabaran mata uang asing	Transactions in foreign currencies are translated into the functional currency at the rates of exchange prevailing at the time the transactions are made. At the end of the reporting period, monetary assets and liabilities denominated in foreign currencies are adjusted to the functional currency to reflect the middle exchange rate published by Bank Indonesia at the last banking transaction date of the period. Gains or losses resulting from such adjustment or settlement of each monetary asset and liability denominated in foreign currencies are credited or charged as current period profit or loss. Transaksi dengan pihak berelasi	Related parties are persons or entities that are related to the Group: (A) A person or a close member of that person family is related to the Group if that person: (A.1) Has control or joint control over the Group; (A.2) Has significant influence over the Group; or (A.3) Is a member of the key management personnel of the Group or of a parent of the Group. (B) A person or a close member of that person family is related to the Group if that person: (B.1) The entity and the Group are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others). (B.2) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member). (B.3) Both entities are joint ventures of the same third party. (B.4) One entity is a joint venture of a third entity and the other entity is an associate of the third entity. (B.5) The entity is a post-employment defined benefit plan for the benefit of employees of either the Group or an entity related to the Group. (B.6) The entity is controlled or jointly controlled by a person identified in a). (B.7) A person identified in (a) (i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity). (B.8) The entity, or any member of a group of which it is a part, provides key management personnel services to the entity or to the parent of the entity. The transactions are made based on terms agreed by the parties. Such terms may not be the same as those of the transactions between unrelated parties. All significant transactions and material balances with related parties are disclosed in the relevant notes to the consolidated financial statements herein.	Transactions with related parties

Pajak penghasilan	Current tax expense is provided based on the estimated taxable profit for the period. Income tax in profit or loss for the period comprises current and deferred tax. Income tax is recognized in profit or loss, except to the extent it relates to items recognized directly in equity or other comprehensive income in which case it is recognized in equity or other comprehensive income. Current tax assets and current tax liabilities are offset if, and only if, the entity has a legally enforceable right to set off the recognized amounts; and intended either to settle on a net basis, or to realize the asset and settle the liability simultaneously. Deferred tax assets and liabilities are recognized for temporary differences between the financial and tax bases of assets and liabilities at each reporting date. Deferred tax assets are recognized for all deductible temporary differences to the extent it is probable that sufficient future taxable profit will be available against which the deductible temporary difference can be utilized. Future tax benefits, such as the carryforward of unused tax losses, are also recognized to the extent that realization of such benefits is probable. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the end of the reporting period. Deferred tax assets and deferred tax liabilities are offset if, and only if, the entity has a legally enforceable right to set off current tax assets against current tax liabilities, and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity, or different taxable entities that intend either to settle current tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered. Amendments to tax obligations are recorded when an assessment is received and/or, if objected to and/or appealed against by the Group, when the result of the objection and/or appeal is determined. Tax regulations in Indonesia stipulate that certain type of income are subject to final tax. The final tax imposed on the gross value of the transaction is still imposed even though the transaction entity suffers losses. Referring to PSAK No. 212 mentioned above, the final tax expense is not included in the scope regulated by PSAK No. 212.	Income taxes
Pinjaman		Borrowings
Provisi	Provisions are recognized when the Group has a present obligation (legal or constructive) where, as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are reviewed at each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed. Contingent assets and liabilities are not recognized in the consolidated financial statements. Contingent liabilities are disclosed in the consolidated financial statements, unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are disclosed in the consolidated financial statements where an inflow of economic benefits is probable.	Provisions
Imbalan kerja karyawan	Short term employee benefits represent compensation provided by the Group such as salaries, allowance, bonus and pension contribution paid, which are recognized when they accrue to the employees. The Group determines its post-employment benefits liability based on Government Regulation Number 35 Year 2021 (PP 35/2021) which implements the provisions of Article 81 and Article 185(b) of Law No. 11/2020 concerning Job Creation (Cipta Kerja). PSAK No. 219 requires the present value of the defined benefit obligation, the related current service cost, and past service cost to be determined using the Unit Credit method. When an entity has a surplus in a defined benefit plan, it measures the defined benefit asset at the lower amount between the surplus of the defined benefit plan and the upper limit on assets determined using a discount rate. An entity recognizes the components of	Employee benefits

	defined benefit cost, except SAK requires or permits such costs as the acquisition cost of the asset, as follows: (1) service cost in profit or loss; (2) net interest on net liability (asset) of defined benefits in profit or loss; and (3) remeasurement of the net liability (asset) of defined benefit in other comprehensive income. Remeasurement on net liability (asset) of defined benefit recognized in other comprehensive income is not reclassified to profit or loss in subsequent periods. However, the entity may transfer the amounts recognized as other comprehensive income in another account in equity. Remeasurement of on net liability (asset) of defined benefits consists of: (a) actuarial gains and losses; (b) return on plan assets, excluding amounts included in net interest on the net defined benefit liability (asset); and (c) any change in the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability (asset). The entity recognizes past service cost as an expense at the earlier of when the amendments or curtailment of the program occurs and when the entity recognizes related restructuring costs or severances. The Group recognizes gains or losses on the settlement of a defined benefit plan when such occur. A curtailment occurs when an entity makes a material reduction in the number of employees covered by a plan, or amends the terms of a defined benefit plan so that a significant element of future service by current employees will no longer qualify for benefits, or will qualify only for reduced benefits. A curtailment may arise from an isolated event, such as the closing of a plant, discontinuance of an operation or termination or suspension of a plan. Before determining the past service cost, or gains and losses on the settlement, the Group shall remeasure the net liability (asset) of defined benefit using current fair value of plan assets and current actuarial assumptions (including current market interest rates and other current market prices) that reflects the rewards offered in the program prior to the amendment, curtailment or settlement program.	
Laba per saham	Basic earnings or losses per share are calculated by dividing profits or losses attributable to ordinary equity holders of the parent entity, by the weighted average number or ordinary shares outstanding, during the period.	Earnings per share
Dividen	Final dividend distributions are recognized as a liability when the dividends are approved in the General Meeting of the Company Shareholders. Dividend distributions are recognized as a liability when the dividends are approved based on a Board of Directors resolution in accordance with the Company Articles of Association.	Dividends
Pelaporan segmen	Entities disclose information that enables users of the financial statements to evaluate the nature and financial effects of the business activities and use approach under which segment information is presented on the same basis as that used for internal reporting purposes. The operating segment is reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker has been identified as the Board of Directors that makes strategic decisions.	Segment reporting

Penerapan standar akutansi baru		The implementation of new statements of accounting standards
Kombinasi bisnis	Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as an aggregate of the consideration transferred, measured on acquisition date at fair value, and the amount of any non-controlling interest in the acquiree. The acquisition costs incurred are expensed in the current year. The excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interest over the net identified assets and liabilities assumed are recorded as goodwill. In contrary, the Company recognizes the lower amount as gain in the consolidated statement of profit or loss and other comprehensive income on the date of acquisition. After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in the business combination is, from the acquisition	Business combination

	date, allocated to each of the Group cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units. Goodwill represents the excess of the cost of an acquisition of a subsidiary, associate or business over the fair value of the Group share of the identifiable net assets of the acquired Subsidiary, associate or business on the acquisition date. Goodwill is derecognized upon disposal or when no future benefits are expected from its use or disposal.	
Penentuan nilai wajar	The fair value of financial instruments that are traded on active markets is determined at each reporting date by reference to quoted market prices or dealer price quotations (bid price for long position and price demand for short position), excluding any deduction for transaction costs. For financial instruments where there is no active market, fair value is determined using valuation techniques. Such techniques may include using recent arm length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis, or other valuation models.	Determination of fair value
Transaksi dan saldo dalam mata uang asing	Transactions in foreign currencies are translated into the functional currency at the rates of exchange prevailing at the time the transactions are made. At the end of the reporting period, monetary assets and liabilities denominated in foreign currencies are adjusted to the functional currency to reflect the middle exchange rate published by Bank Indonesia at the last banking transaction date of the period. Gains or losses resulting from such adjustment or settlement of each monetary asset and liability denominated in foreign currencies are credited or charged as current period profit or loss. Goodwill	Goodwill represents the excess of the cost of an acquisition over the fair value of the Group share of the net identifiable assets of the acquired Subsidiary, associate or jointly controlled entity at the effective date of acquisition. Non Controlling Interest () are measured at their proportionate share of the net identifiable assets at the acquisition date. If the cost of acquisition is less than the fair value of the net assets acquired, the difference is recognized directly in the consolidated profit and loss and other comprehensive income. Goodwill on acquisitions of associates and jointly controlled entity is included in investment in associates and jointly controlled entities. Goodwill is carried at cost less accumulated impairment loss. Goodwill on acquisition of Subsidiaries is tested for impairment annually. Goodwill is allocated to Cash Generating Unit () or groups of CGU for the purpose of impairment testing. The profit or loss on disposal of Subsidiaries, associates and jointly controlled entities includes the carrying amount of goodwill relating to the entity sold.	Goodwill
Investasi pada entitas asosiasi		Investment in associates
Aset takberwujud	Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is its fair value as of the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the consolidated statement of profit or loss and other comprehensive income in the year in which the expenditure is incurred. The useful lives of	Intangible assets

intangible assets are assessed as either finite or indefinite. Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset is reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets is recognized in the consolidated statement of profit or loss and other comprehensive income in the expense category consistent with the function of the intangible assets. Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the consolidated statement of profit or loss and other comprehensive income when the asset is derecognized. Goodwill represents the excess of the cost of an acquisition over the fair value of the Group share of the net identifiable assets of the acquired Subsidiary, associate or jointly controlled entity at the effective date of acquisition. Non Controlling Interest () are measured at their proportionate share of the net identifiable assets at the acquisition date. If the cost of acquisition is less than the fair value of the net assets acquired, the difference is recognized directly in the consolidated profit and loss and other comprehensive income. Goodwill on acquisitions of associates and jointly controlled entity is included in investment in associates and jointly controlled entities. Goodwill is carried at cost less accumulated impairment loss. Goodwill on acquisition of Subsidiaries is tested for impairment annually. Goodwill is allocated to Cash Generating Unit () or groups of CGU for the purpose of impairment testing. The profit or loss on disposal of Subsidiaries, associates and jointly controlled entities includes the carrying amount of goodwill relating to the entity sold.
