

Nomor Surat	L9.013C-2026.132
Nama Perusahaan	Elnusa Tbk
Kode Emiten	ELSA
Lampiran	2
Perihal	Siaran Pers - Elnusa Perkuat Peran Strategis melalui Dual Completion Bersama PHR Zona 4 untuk Dukung Target Produksi Pertamina

Dengan ini kami untuk dan atas nama perusahaan menyampaikan Laporan Informasi atau Fakta Material sebagai berikut:

Nama Emiten atau Perusahaan Publik	Elnusa Tbk
Bidang Usaha	Jasa Energi
Telepon	(021) 788-30850
Faksimili	(021) 788-30883
Alamat Surat Elektronik (email)	corporate@elnusa.co.id

Tanggal Kejadian	22 Juli 2026
Jenis Informasi atau Fakta Material	Siaran Pers - Elnusa Perkuat Peran Strategis melalui Dual Completion Bersama PHR Zona 4 untuk Dukung Target Produksi Pertamina

Uraian Informasi atau Fakta Material	Jakarta, 22 Juli 2026 - PT Elnusa Tbk (Elnusa), perusahaan jasa energi terintegrasi yang tergabung dalam Subholding Upstream Pertamina, memperkuat perannya sebagai mitra strategis PHR Zona 4 melalui implementasi teknologi Dual Completion di Adera Field. Kolaborasi ini menjadi bagian dari upaya mendukung agenda Pertamina dalam meningkatkan produksi migas nasional sekaligus memperkuat ketahanan energi Indonesia. Implementasi Dual Completion yang didukung Elnusa merupakan bagian dari strategi pengembangan lapangan PHR Zona 4 dalam mengoptimalkan potensi lapangan migas yang telah memasuki fase mature field. Teknologi ini melengkapi berbagai inisiatif pengembangan seperti development drilling, step out drilling, dan optimalisasi reservoir guna meningkatkan efisiensi pemanfaatan cadangan hidrokarbon. Dalam implementasi tersebut, Elnusa menghadirkan dukungan melalui kapabilitas Well Intervention & Completion, Engineering Services, serta eksekusi operasi lapangan yang mengedepankan standar HSSE. Kapabilitas tersebut memungkinkan pekerjaan completion dilaksanakan secara tepat waktu, aman, dan sesuai standar operasional sehingga mendukung optimalisasi produksi lapangan PHR Zona 4 sekaligus memberikan nilai tambah bagi pengembangan lapangan migas Pertamina. Direktur Operasi PT Elnusa Tbk, Andri Haribowo, mengatakan bahwa kolaborasi dengan PHR Zona 4 mencerminkan komitmen Elnusa untuk terus menghadirkan solusi operasi yang memberikan nilai tambah bagi industri hulu migas nasional, "Keberhasilan implementasi Dual Completion bersama PHR Zona 4 merupakan bukti bahwa sinergi antara operator dan perusahaan jasa energi mampu menciptakan operasi yang lebih produktif dan efisien. Kapabilitas Elnusa menjadi bagian dari upaya Pertamina dalam mengoptimalkan pengembangan lapangan melalui sinergi dengan mitra strategis. Kolaborasi ini mencerminkan bagaimana kompetensi nasional mampu memberikan nilai tambah bagi keberlanjutan operasi hulu migas Indonesia," ujar Andri. Melalui implementasi Dual Completion pada sumur BNG-D14 di Adera Field, dua reservoir dapat diproduksi melalui satu sumur tanpa memerlukan pengeboran sumur baru pada setiap lapisan. Pendekatan ini meningkatkan efisiensi pengembangan lapangan, mengurangi kebutuhan intervensi sumur, serta mengoptimalkan pemanfaatan reservoir yang masih produktif, sehingga menjadi solusi efektif bagi lapangan migas yang telah memasuki fase mature. Penerapan Dual Completion pada program pengembangan lapangan PHR Zona 4 memberikan tambahan produksi sekitar 480 BOPD minyak dan 3,3 MMSCFD gas dari target 186 BOPD dan 1,09 MMSCFD . Implementasi teknologi ini menjadi salah satu upaya optimalisasi lapangan mature melalui pemanfaatan reservoir yang lebih efisien. Teknologi ini selanjutnya akan dilakukan pada sumur -sumur berikutnya GNK-PD80 dan BNG-B7. Menurut Andri, keberhasilan tersebut menunjukkan bahwa kolaborasi yang erat antara operator dan penyedia jasa energi memiliki peran penting dalam menciptakan operasi yang semakin efektif, aman, dan berkelanjutan, "Kami percaya
---	---

keberhasilan peningkatan produksi migas tidak hanya ditentukan oleh teknologi, tetapi juga oleh kolaborasi yang solid antar entitas Pertamina Group. Dengan pengalaman dan kapabilitas yang dimiliki, Elnusa akan terus mendukung PHR dan seluruh entitas Pertamina Group melalui layanan yang andal, inovatif, serta berorientasi pada operational excellence guna mendukung target produksi migas nasional dan memperkuat ketahanan energi Indonesia," tutup Andri.

Ke depan, Elnusa akan terus memperkuat sinergi dengan Pertamina Group melalui penyediaan layanan energi terintegrasi yang mendukung peningkatan produktivitas lapangan migas, percepatan implementasi teknologi, serta penerapan operational excellence. Komitmen tersebut menegaskan peran Elnusa sebagai mitra strategis Pertamina dalam menciptakan operasi hulu migas yang lebih efisien, berkelanjutan, dan berdaya saing, sekaligus mendukung ketahanan energi nasional.

Sekilas Elnusa (IDX: ELSA)

PT Elnusa Tbk (Elnusa) merupakan Anak Perusahaan PT Pertamina Hulu Energi (PHE) yang tergabung dalam Subholding Upstream Pertamina, bergerak dalam bidang jasa energi yang terintegrasi untuk memberikan solusi total. Elnusa memiliki DNA Resilience dan inovasi lebih dari 54 Tahun dalam industri energi, memiliki kompetensi inti pada jasa hulu migas, jasa distribusi dan logistik energi serta jasa penunjang. Lini jasa hulu migas meliputi jasa Geoscience & Reservoir (land, transition zone & marine serta data processing), jasa pengeboran & pemeliharaan lapangan migas (drilling & workover), jasa engineering, procurement, construction & operation maintenance (EPC-OM). Lini jasa distribusi dan logistik energi meliputi jasa transportasi BBM, pengelolaan depot, dan penjualan chemical. Lini jasa penunjang meliputi jasa marine support, fabrikasi, hingga manajemen data. Elnusa terus berkomitmen menerapkan Tata Kelola Perusahaan sesuai dengan prinsip-prinsip GCG dan juga ESG untuk mewujudkan Perusahaan yang berdaya saing tinggi, terus tumbuh dan memberikan kebermanfaatan yang berkelanjutan untuk seluruh pemangku kepentingan. Email Address	corporate@elnusa.co.id

Date of Event	22 July 2026
Type of Material Information or Facts	Press Release - Elnusa Strengthens Strategic Role through Dual Completion with PHR Zona 4 to Support Pertamina's Production Targets

Description of Material Information or Facts	Jakarta, 22 July 2026 - PT Elnusa Tbk (Elnusa), an integrated energy services company and part of Pertamina's Upstream Subholding, continues to strengthen its role as a strategic partner of Pertamina Hulu Rokan (PHR) Zona 4 through the implementation of Dual Completion technology at Adera Field. This collaboration forms part of Pertamina's broader initiative to increase national oil and gas production while reinforcing Indonesia's energy security. The Dual Completion implementation supported by Elnusa is part of PHR Zona 4's field development strategy to optimize the potential of mature oil and gas fields. The technology complements various development initiatives, including development drilling, step-out drilling, and reservoir optimization, to improve the efficiency of hydrocarbon recovery. In supporting the implementation, Elnusa leveraged its capabilities in Well Intervention & Completion, Engineering Services, and field operation execution while maintaining the highest Health, Safety, Security, and Environment (HSSE) standards. These capabilities enabled completion activities to be carried out safely, on schedule, and in accordance with operational standards, contributing to the optimization of production at PHR Zona 4 while creating added value for Pertamina's upstream field development. PT Elnusa Tbk's Operations Director, Andri Haribowo, stated that the collaboration with PHR Zona 4 reflects Elnusa's commitment to continuously delivering operational solutions that create value for Indonesia's upstream oil and gas industry, "The successful implementation of Dual Completion with PHR Zona 4 demonstrates that strong collaboration between operators and energy service companies can deliver more productive and efficient operations. Elnusa's capabilities have become an integral part of Pertamina's efforts to optimize field development through strategic partnerships. This collaboration reflects how national expertise can contribute meaningful value to the sustainability of Indonesia's upstream oil and gas operations," said Andri. Through the implementation of Dual Completion at the BNG-D14 well in Adera Field, two productive reservoirs can be produced simultaneously through a single wellbore without requiring separate wells for each reservoir interval. This approach improves field development efficiency, reduces the need for additional well interventions, and maximizes the utilization of productive reservoirs, making it an effective solution for mature oil and gas fields. The application of Dual Completion under PHR Zona 4's field development program has delivered an additional production of approximately 480 barrels of oil per day (BOPD) and 3.3 million standard cubic feet of gas per day (MMSCFD), exceeding the initial target of 186 BOPD and 1.09 MMSCFD. This technology has become one of the key approaches for optimizing mature fields through more efficient reservoir utilization. Following this successful implementation, the technology is planned to be deployed in additional wells, including GNK-PD80 and BNG-B7. According to Andri, the achievement highlights the importance of close collaboration between operators and energy service
---	--

providers in creating safer, more effective, and sustainable operations, "We believe that increasing oil and gas production is driven not only by technology, but also by strong collaboration among entities within the Pertamina Group. Backed by our experience and technical capabilities, Elnusa remains committed to supporting PHR and other Pertamina Group entities through reliable, innovative, and operational excellence-driven services to help achieve national oil and gas production targets while strengthening Indonesia's energy security," Andri concluded.

Moving forward, Elnusa will continue strengthening its synergy with Pertamina Group by delivering integrated energy services that support higher field productivity, accelerate technology implementation, and promote operational excellence. This commitment reaffirms Elnusa's role as Pertamina's strategic partner in developing more efficient, sustainable, and competitive upstream operations while contributing to Indonesia's long-term energy security.

About Elnusa (IDX: ELSA)

PT Elnusa Tbk (Elnusa) is a subsidiary of PT Pertamina Hulu Energi (PHE) which is part of the Pertamina Upstream Subholding, which operates in the field of integrated energy services to provide total solutions. Elnusa has DNA of Resilience and innovation for more than 54 years in the energy industry, has core competencies in upstream oil and gas services, energy distribution and logistics services and supporting services. The upstream oil and gas service line includes Geoscience & Reservoir services (land, transition zone & marine and data processing), drilling & oil and gas field maintenance services (drilling & workover), engineering, procurement, construction & operation maintenance (EPC-OM) services. The energy distribution and logistics service line includes fuel transportation services, depot management and chemical sales. The supporting service line includes marine support services, fabrication, and data management. Elnusa continues to be committed to implementing Corporate Governance in accordance with GCG and ESG principles to create a company that is highly competitive, continues to grow and provides sustainable benefits for all stakeholders.
